ARTICLE 11. IRREPARABLE HARM. It is mutually agreed the breach of this Contract on Contractor's part shall result in irreparable and continuing damage to the Board for which money damages may not provide adequate relief. Therefore, the breach of this Contract on Contractor's part shall entitle the Board to both preliminary and permanent injunctive relief and money damages insofar as they can be determined under the circumstances.

ARTICLE 12. NOTICES. Notices to either party provided for in this Contract shall be sufficient if sent by email or by Certified or Registered mail, postage prepaid, addressed to the signatories on this contract, or to their designee.

ARTICLE 14. CHOICE OF LAW AND FORUM. The state courts of Wisconsin shall be the sole forum for all disputes arising of this Contract. The validity, construction, enforcement and effect of this Contract shall be governed solely by the laws of the State of Wisconsin.

ARTICLE 15. GUARANTEED SAVINGS. This contract is governed under Wisconsin State Statute 66.0133 which requires the Contractor to guarantee the energy savings that the project will produce. In this contract the FEMP IPMVP protocol used will be Option A - Retrofit Isolation. The values calculated using IPMVP Option A will be calculated by the district and shared with the contractor. The resulting values will be used to create the stipulated values for each Facility Improvement Measure. These Stipulated values will be agreed to with the district and the contractor and will then be deemed to guarantee.

Measured Project Benefits are determined by partial field measurement of the energy use of the system(s) to which an Improvement Measure was applied separate from the energy use of the rest of the facility. Utility Cost Avoidance will be measured using FEMP IPMVP Option A and stipulated for the remainder of the contract.

Partial measurement means that some but not all parameters will be measured. Careful review of the design and installation of Improvement Measures is intended to demonstrate that the stipulated values fairly represent the probable actual values.

Agreed-upon values will be shown in the measurement and verification plan. Engineering calculations using measurements and stipulations are used to calculate Measured Project Benefits for the duration of the Contract Term.

Measured Project Benefits from the following Improvement Measures will be calculated using Option A:

Source of Measured Benefit	Electric M&V Option	Gas M&V Option	First Year Utility Avoidance
Corridor Upgrade/Replacement	A		
Auditorium Upgrade/Replacement	A		
Gym Upgrade/Replacement	A		
Gym Destratification	A	A	
Cafeteria Upgrade/Replacement	A		
Total Measured Project Benefits - Option A			

Contractor guarantees the annual savings as noted in the Savings Summary Chart and the stipulated savings for the entire payback period as stated in the Annual Cost Avoidance Chart set forth in Appendix B; and based on the Energy Conservation Report provided in Appendix A attached hereto and based on installation of all equipment as specified and designed.

Whereas the Energy Conservation Report is based on stipulated savings and will not require additional measurement nor verification after Contractor has completed performance of the work and contract is paid in full, MPS will not receive any additional payments from Contractor and Contractor will not receive any additional payments from MPS based on future performance of installed Facility Improvement Measures.

IN WITNESS WHEREOF, the parties have executed this Contract the day and the year first above written and the Contractor and Surety have affixed their corporate seals thereto.
